AUTOMATIC TAPING TOOLS

TAPING TOOLS

Speed up taping with a precision designed automatic taping tool that simultaneously applies joint tape and compound to flat and internal joints.

AT-2000

Joint Compound consistency is an important part of achieving a good finish. Automatic taping tools require a thinner compound (more water) than setting by hand. The consistency should be smooth and creamy; slightly thinner for taping, slightly thicker for finishing. Ensure you follow manufacturer's recommendations.

MUD BOXES

The Tapepro Mud Boxes are the definition of tough mudders. They're constructed from robust materials like stainless steel and industrial plastics making them extremely hard wearing. The simple "mud bath" design makes the Mud Box® the fastest taping tool to learn and the easiest to use.

WMB-L

- Combined creaser / cutter
- Mud flow adjuster
- Can be filled with Loading Pump (LP-EZ) and Flat Box Filler (FBF), using the MudShark (FA-CT) or by hand

AUTOMATIC TAPER

Tapepro combines precision engineering, superior design features and high quality materials to create the fastest and best Automatic Taper on the market.

FLAT FINISHING

Achieve the perfect machine finish on your flat joints and perfect coverage over your screws fast with Tapepro's range of flat finishing tools. Flat Boxes are easy to use, provide a great finish and are the perfect place to start when investing in Automatic Taping Tools.

BOOSTER® AUTOMATIC BOXES

Tapepro Booster® Automatic Boxes are Flat Boxes - with a difference. The Booster Auto boxes have reverse springs which help force out the joint compound. This reduces the effort required and is particularly handy for out of position or difficult to reach areas. They're designed to take the force out of flat finishing particularly when finishing very high or low flat joints or vertical joints

CORNICE HEADS

Install cornice in half the time of traditional methods with the Tapepro Cornice Heads. Simply fill the Tapepro Compound Applicator Tube (CA-T) with cornice cement, snap on a Cornice Head and run along the wall/ceiling junction to apply the perfect amount of adhesive for cornice installation.

- Reduce installation time and fatigue
- Made from super hard wearing industrial plastic
- Apply consistent, measured beads of cornice adhesive reducing wastage
- Compatible with the Compound Applicator Tube (CA-T)

OUTSIDE CORNER ROLLER

The Outside Corner Roller is designed to be used on a multitude of different 90° corner beads and tapes including Trim-Tex™ and No-Coat®. It delivers firm, even pressure to the entire trim for a strong bond to the corner - every time.

- Tough stainless steel sheet metal body with acetal plastic rollers on stainless steel bushes
- Rollers pivot in the centre allowing for corners that are not exactly 90° and corner beads that have either tapered or parallel legs
- Swivel attachment adjusts to any angle
- Install Trim-Tex Mud Set™, HydroTrim, Paper Face Metal Bead, No-Coat® and more
- OCR is compatible with the 1200mm Corner Roller Handle (CRA015) and the Pro-Reach Extendable Handle 960-1600mm (XH)

TC-1400

Tapepro's Slayer Corner Kit includes all the tools required to tape and set internal corners. The kit will significantly speed up the internals process when compared to hand taping and setting and includes the Tapepro Inside Corner Roller to ensure even tape bedding. The Slayer Kit allows the user to run base compound along the internal joint with the compound tube and applicator head. The roller will bed the joint tape squarely into the corner and spread the compound evenly. The 55mm glazing head then feathers the compound to a flat finish. Once base compound is dry the compound application process is repeated for subsequent topping coats with the 75mm glazing head.

SLAYER CORNER KIT

“ **Setting corners with the Slayer Kit not only saves time but also reduces waste by maintaining a fixed level of applied compound.** ”

The Slayer tools are secured in a tough aluminium case that's designed for protection and will make transporting them simple.
